AlliedVoiceworks

Connected Communications.
Intelligent Solutions.

LOCAL EXPERTS. ENTERPRISE RESULTS.

MANAGED IT, INFRASTRUCTURE & SECURITY

Managed IT that lets you focus on your business.

We host your critical applications and data in a professional data center and become your **first call for IT**. From network design and cabling to video surveillance and door access, one accountable local partner designs, installs and supports it all.

MANAGED IT | INFRASTRUCTURE | SURVEILLANCE | DOOR ACCESS

MANAGED SERVICES & INFRASTRUCTURE

Predictable IT, built on a solid network

Run your business instead of a server room, with fixed costs and 24×7 support.

Hosted Servers
No more buying servers or Microsoft server licenses, with little up-front capital investment.

Managed Desktops
Computers refreshed every three years, a standard image on every machine and hot-swap replacement.

Security & Patching
Centrally managed antivirus, Windows patch management and compliance reporting.

Backup & Continuity
Data backup and business continuity, plus simple connectivity between multiple locations.

Network Design
LAN, WAN, VLAN, VPN and SD-WAN, internet and remote access, designed around your business.

Wireless & Cabling
Wireless networks and structured cabling, installed as an extension of your IT staff.

Monitoring & SLAs
24×7 network health monitoring and remote support, backed by service level agreements.

24×7 Help Desk
Around-the-clock help desk, with issues escalated and managed through to resolution.

SECURITY

Peace of mind for your people and property

Video surveillance, smart analytics and door access control, chosen, installed and configured for your building and conditions.

- **Video Surveillance** — Right image quality, viewing range and infrared distance
- **Smart Video Analytics** — Object counting, activity monitoring, real-time alerts
- **Door Access Control** — PIN, badge or biometrics, across multiple locations
- **Remote Viewing** — Live or recorded video on computer, tablet or phone
- **SMS & Email Alerts** — Know what's happening without watching a screen
- **Complete Access History** — Every door event logged and easily searched

MANAGED IT & SECURITY

One partner for your whole technology stack

Managed services, infrastructure and security, designed, installed and supported by one accountable partner.

Managed Services

Fixed, predictable IT costs.

- Hosted servers in a professional data center
- Managed desktops, refreshed every three years
- Central deployment of most software
- No large capital outlay

Infrastructure Design

From idea and consultation through design.

- LAN, WAN, VLAN, VPN and SD-WAN
- Thin-client computing and virtualization
- NAS/SAN storage and backup
- Email and Office 365

Installation & Support

Your IT team, extended.

- An extension of your existing IT staff
- Or an alternative to keeping IT in-house
- Help desk services and SLAs

Video Surveillance

Cameras chosen for your building and conditions.

- Remote viewing of footage
- Network security and scalability
- Right-sized storage capacity

Smart Video Analytics

Custom dashboards built from virtual sensors.

- Object counting and activity monitoring
- Real-time SMS and email alerts to staff
- Works with existing infrastructure

Door Access Control

Who can enter, where, and when.

- Restrict access by role or status
- Custom alerts and rules
- Simpler onboarding and offboarding
- Complete, searchable access history

HOW IT WORKS

From assessment to go-live, we handle it

Professional implementation, training and project management, delivered by local experts.

1. **Discovery**
   We review your network, servers, desktops and security needs.
2. **Design & Configure**
   Network, hosting, cameras and access control are designed and configured for you.
3. **Install, Test & Train**
   Everything is installed and fully tested, and your team is trained.
4. **Support 24×7**
   Ongoing monitoring, help desk support and a defined service level agreement.
